SENT BY FACSIMILIE TRANSMISSION

Dear Mr. Palmer:

This letter is our sixth request for additional information and clarification on issues surrounding your AGIA application. This letter will cover a specific issue.

TransCanada in sections 2.2.3.4 and 2.2.3.5 proposes certain general tariff and rate structure it plans to offer at the binding open season. ***If the FERC or NEB do not authorize those terms, how will the FERC or NEB decision affect the Alternative Ratemaking Methods and Incentives proposed in section 2.2.3.6?***

Thank you for your response.

Sincerely,

A handwritten signature in black ink, appearing to read "Ralph Samuels".
