

The background is a collage of four images: top-left shows a wide river or coastal area; top-right shows a close-up of a financial table with a pen resting on it; bottom-left shows a classical building facade with the word 'BANK' in large gold letters; bottom-right shows two workers in safety gear welding a large pipe.

Pipeline Investment Process and Evaluation Criteria

Alaska Legislative Audit & Budget Committee
Alaska Senate Resources Committee
October 13, 2004

Ron Brintnell
Director
Gas Pipeline Development

Owners & Operators

- Almost all major interstate natural gas transportation systems in North America are owned and operated by independent (non-producer) pipeline transportation companies
- Alliance Pipeline (Enbridge – 50% owner) was initially a producer led and majority owned project – all producers have since divested of their interest
- Mackenzie Delta pipeline is the most recent producer led pipeline initiative
- Almost every new natural gas pipeline project / proposal in North America is being developed by pipeline companies

Catalysts For Development

Supply Push

- **No existing take-away capacity into target market**
(ex. M&NEP, Mackenzie, Alaska)
- **Insufficient take-away capacity**
 - **depresses wellhead prices relative to market**
(ex. Alliance, US Rockies)

Catalysts For Development

Market Pull

- **Growing demand**
 - Economic, technology (gas fired generation)
 - Demographics
- **Price escalation**
 - Insufficient supply results in higher prices (ex. Millennium)
- **Insufficient peak load supply results in seasonal price spikes / price instability (both gas and electricity)**

Investment Environment

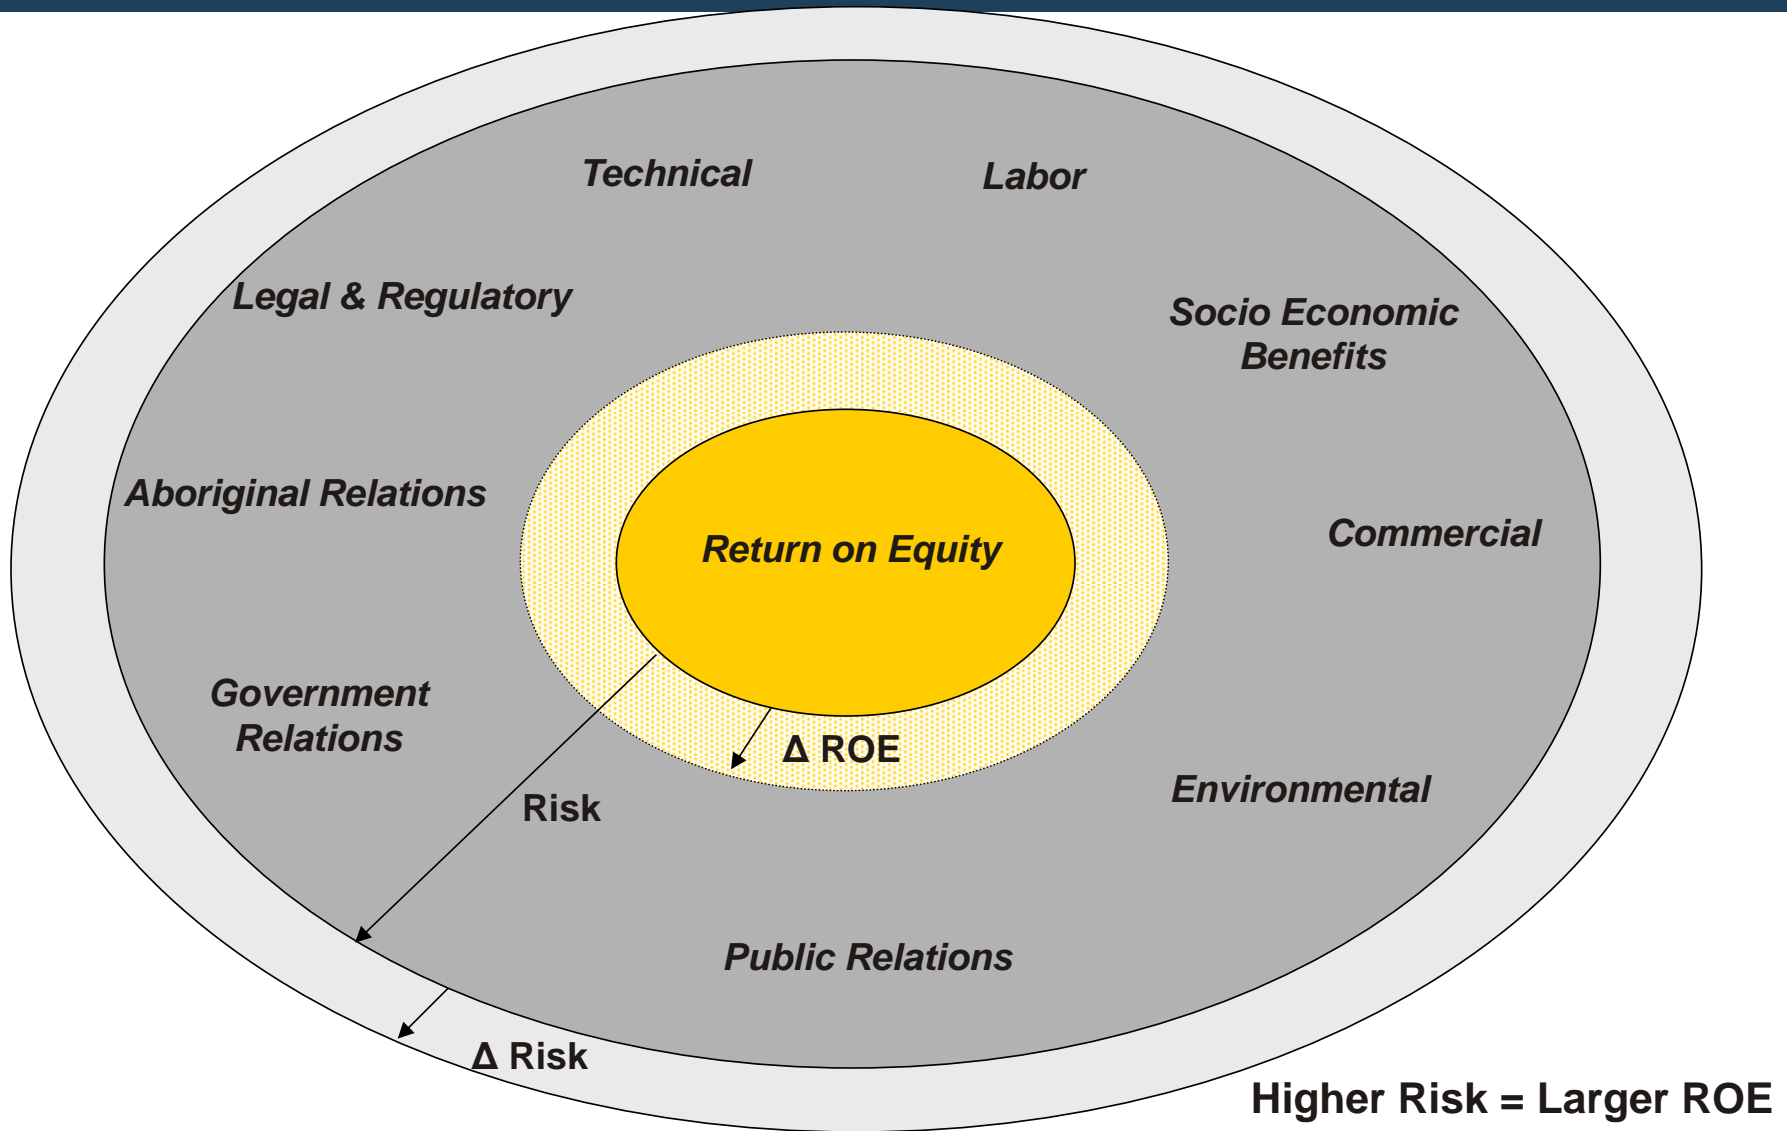

- **Supply commitment**
 - Quality and reserve life certainty
- **Shipper commitment**
 - Creditworthiness
- **Constructability**
 - Land access, environment, material, labor
- **Financing**
 - Equity and debt

Motivations

- **Producer**
 - Lowest cost of delivery (highest possible netback)
 - Lowest possible shipping risk (short term contracts, off-ramps, tariff certainty)
 - Reliability
- **Market**
 - Lowest cost of delivery
 - Competitive & reliable gas supply
 - Lowest possible shipping risk (short term contracts, off-ramps, tariff certainty)
 - Reliability
- **Transporter**
 - Fair return
 - Manageable risk
 - Financial certainty

Investment Considerations – Risk vs. Reward

Pipeliners Perspective: What's Needed to Invest

- Adequate ROE relative to risk (typically 12 – 15%)
- Access to debt
- Cost certainty
- Financially strong shippers
- Regulatory certainty
- Environmental process certainty
- Aboriginal and land owner alignment

Financing Considerations

- **A large amount of capital is required**
 - **usually between 30-40% equity and 60-70% debt**
- **A number of banks usually provide debt financing, and in turn look carefully at all project details**
 - **Amount of equity**
 - **Financial strength of pipeline owners**
 - **Financial strength of shippers**
 - **Nature and terms of service agreements**
 - **Regulatory approvals**
 - **Experience of pipeline owners**
 - **Quality of natural gas reserves and reserve life**

Sources Of Debt

- **Banks - a consortium based on project size**
- **Capital Markets/Bonds**
- **Insurance Companies**
- **Pension Funds**
- **Municipal Bond Market**
- **Sponsors**

Lender's Terms

- Address capital cost overruns
- Lender has first priority over cash flow
- Incoming cash versus interest and principle repayment
- Risks associated with maintaining cash flow
- Debt amortization (equal payments, mortgage, bullet or customized)
- Coverage Ratio
 - interest coverage
 - debt service coverage ratio
 - principle
 - interest
 - banking fees
 - reserve accounts

Benefits of Enbridge Participation

- Unique northern construction and operating expertise reduces construction risk
- Strong environmental track record
- Significant history of engagement with First Nations

Benefits of Enbridge Participation

- **Potential market participant**
— reduce overall shipping risk for Producers
- **Strong track record of negotiated tolling settlements with Producers**
- **Most recent cross-border regulatory experience**
- **Proven ability to lead multi-partner large scale projects**
